 3. Technique 3- Real Life or fake any example
 4. Technique 4- make concessions
 5. Both sides Discussion

Technique no. 1 – paraphrase the question/ question সম্পর্কে
Comments + Linking word

Hearing =

সহমত। -

I also did hear different sorts = past indefinite

Subject + verb er past form

Technique 2 - explain why?

Why- **because, since, as, due to the fact that, the reason behind that**

Sample question:

Do you read a lot of **books** or do you prefer watching tv?

- I prefer **reading books** over enjoying random programs on television. However, that does not mean that I hate watching television. **I like reading books more as/since/because I always feel that reading is a far better than watching television.**
- **Every book** gives us the opportunity to learn something new **and** the time spent on reading a **book is more constructive.** I can't say the same for the TV. We often watch TV to **kill** our valuable time and **end up** surfing through channels rather than watching something meaningful.

Technique 3- Real Life or fake any example- for instance, for example, say for example, such as, like-

Sample question: have the **mode of transport** people use in your country **changed** much over the **last few decades?**

Sample answer: absolutely, they have changed a lot. In the past, most people used **bicycles**. But now they **predominantly** use **motorbikes**. **For**

example, a recent survey found that about **12%** of people in my city now own a motorbike.

A recent survey, published by “Daily Star” in 2021, found that.....৩২% of people in my city now own a motorbike.

Technique 4- make concessions/Double Standard - (দুই দিকের কথাই বলতে হবে)

Do you read a lot of books or do you prefer watching tv?

- I prefer **reading books** over enjoying random programs on television. However, that does not mean that I hate watching television. I like reading books more **as/since/because** I always feel that reading is a far better than watching television. Every book gives us the opportunity to learn something new and the time spent on reading a book is more constructive.
অন্য পক্ষ নিয়েও কিছু কথা বলা -
- I can't say the same for the TV.
- We often watch TV to **kill** our valuable time and **end up** surfing through channels rather than watching something meaningful.

1.***Comparison and contrast***

regarding time and age, - talk about the **difference and/or similarities** between two things.

Time: **past + future, past + present, present+ future...**

- It's obvious that/ it certainly is that
- **Another thing which should be focused/emphasized**
- It's really a tricky one, I didn't think it before but from my point of view.....
- **I think-** or,
I would like to express **my biased** opinion that.....
- Well, I think that's a really interesting question, but I never thought about it before. I
guess I'd have to say that **I agree**.....
- Well let me clarify that by pointing out
- **Another way to put it is.....**

Degree-**comparative** degree -

Example question: **do you think primary school** children should learn a **second language** or should they wait until **secondary school?**

Answer- it's obvious that the earlier children start a language, the easier it becomes in later life. However, some parents might think that some hard subjects **like math** are **more important** than languages at primary level. They may also think that **a foreign language** is **less important** than their first language and this should be **prioritized**.

2. Opinion -

- as I see it,
- Personally,
- For me,

- In my opinion,
- I'm convinced that
- I'm certain that...
- I'm sure that...
- I do believe...
- I guess that...
- I suppose that....
- I'd say that...

Sample question: what are some **of the ways** people can help others in the **community/society?**

Answer- as I see it, **there are many ways one can help the needy**, but the best way is by making **charitable donations**. **I'd say that/in my opinion**, people can choose a **charity** and simply donate a sum of money and leave it to them to help others in need. For example, I recently gave money to an **orphanage**. I don't have time to help them personally, so I just leave it up to them to use the money as they **see it/fix**.

3. **Predict/future**

It is predicted that

It intends to

I foresee - ভবিষ্যৎ বানী করা...

It is foreseeable...

Conditional - present (if + present indefinite + future indefinite)

It is likely that ...

It is probable that...

It is unforeseeable that...

I envisage... (বিবেচনা করা)

Example question: Some people say that working from home will be quite common in the future. What do you think?

Answer- it is foreseeable that more people will work from home in the future. If the internet becomes faster and there are more programs such as zoom/google meet/skype, that allow people to work from home more easily. I'd predict that more people **will stay** at home.

Future Perfect Tense- **By + Time** থাকলে Future Perfect Tense হয়।

- By the grace of Almighty Allah, by **2028**, I **will have** been citizen in Canada.

4. Evaluate

Idea/opinion clearly বলতে হবে

+ agree/disagree এর আপনি কোনটার পক্ষে, সেটাও বলতে হবে।

Linking words if you agree with your opinion/evaluation:

I could agree with you more....

That's so true.....

That's for sure.....

No doubt about that.....

I suppose so/I guess so.....

You/they have a point there.....

Linking words if you DON'T agree with your opinion/evaluation:

I don't think so....

I'm afraid I do disagree...

I totally disagree.....

I beg to differ

I'd say the exact opposite...

Not necessarily...

That's not always true...

That's not always the case.....

Sample question: some people say that people helped **others more** in the past than they do now. Do you **agree or disagree?**

Sample answer: I don't think so. When it comes to my **parent's generation**, I think that they are quite **skeptical/doubting** about helping other people in the community, but my generation are regularly doing things to improve it, such as volunteering for various **environmental** and **charitable organizations** such as **blood donation.**

5. Hypothetical

unreal, imaginary, unlikely or impossible

present conditional - if you come, I will give you a surprise.

Past conditional - if + **past indefinite tense** + past conditional.

(sub + should/could/would/might+ verb 1st + extension/object)

If you came, I would give you a surprise

Past perfect conditional – if you had come, I would have given you a surprise.

Sample question: if you could choose any country to live in, where would you choose?

Answer: if I could live in any country, I would **probably** choose **Australia/UK/Canada/USA**. The weather of CANADA is great; **the people are super friendly** and just imagine living beside all those sea beaches. If I could choose another country, it would have to be Italy.

6. Past

used to + verb 1st

Subject + **am/is/are/was/were/get** + used to + verb (ing)

Or, would+ infinitive ব্যবহার করে past এর অভ্যাস নিয়ে কথা বলা যায়।

Simple past/past indefinite- Past continuous- Past perfect -

Example: how had teaching changed in your country over the past few decades?

Answer: In the past, teachers simply lectured students and the students just listened to what they said. **We were given/teachers used to give us** lots of facts to learn and there was no room for **creativity** or freedom of expression. I would remember learning lots of things without **the theory** behind it. However, recent **studies** have **developed a lot** and students are learning more compared to previous.

7. Cause (Negative) and effect or solution

Linking phrase- because,

As a result,

Resulted in... Due to...

Caused .. Led to...

Means that...,

Question: how does **advertising influence** what **people** choose to **buy**?

Answer- I do think that advertising has **a big influence** on what people purchase **and** often leads to them always sticking with the same brand. For example, I always drink coca cola and I believe this is because I grew up watching all those ads on TV and I instinctively buy it as a result.
